Definitions of **telescope** on the Web:

- crush together or collapse; "In the accident, the cars telescoped"; "my hiking sticks telescope and can be put into the backpack"
- a magnifier of images of distant objects
- make smaller or shorter; "the novel was telescoped into a short play"
wordnet.princeton.edu/perl/webwn
- A telescope (from the Greek tele = 'far' and skopein = 'to look or see'; teleskopos = 'far-seeing') is an astronomical tool which gathers and focuses electromagnetic radiation. Telescopes increase the apparent angular size of objects, as well as their apparent brightness. ...
en.wikipedia.org/wiki/Telescope
- An instrument designed to gather light (or other kinds of radiation) from a large area and bring it to a focus, where the radiation can be analyzed. The primary purpose of most astronomical telescopes is to provide the brightest possible images, since most things that astronomers study are very faint. Thus, the "size" associated with a telescope (such as the "200-inch" on Palomar Mountain) refers to the diameter of its light-gathering area.
www.astrosociety.org/education/publications/tnl/14/14.html
- A devise that uses lenses or mirrors to enlarge images of distant objects. Astronomers use telescopes to study planets and stars.
library.thinkquest.org/5014/glossary.html
- A device used to see distant objects, such as those in space.
regentsprep.org/Regents/global/vocab/topic_alpha.cfm
- Instrument used to capture as many photons as possible from a given region of the sky and concentrate them into a focused beam for analysis.
astronomy.nyu.edu.cn/astron/AT3/GLOSS_T.HTM
- An instrument for collecting and examining electromagnetic radiation, especially an arrangement of lenses or mirrors or both that gathers visible light, permitting direct observation or photographic recording of distant object.
www.phy.ohiou.edu/academicpro/indepen/One/glos.htm
- The telescope and microscope are similar in that a real image (qv) formed by a lens can be treated as if it were the actual object being observed; ile., it can be magnified or reduced and shape and dimensions examined. See also macrometrology, micrometrology and microscope.
www.ticms.com/wizard/glossary.htm
